David Hurley AC DSC (Retd)

Suicide Prevention Australia recognises that discussion of suicide methods might be distressing for some readers and research has found public reporting on the methods of suicide has been linked to increases in use of that method and overall suicide rates.

This submission includes discussion of methods of suicide and means restriction and may raise concerns for some readers.

A copy of the submission is available on request by emailing [policy@suicidepreventionaust.org](mailto:policy@suicidepreventionaust.org)
